

## MOJAVE MAGNUM – 2018

### Corrections and updates to Rule Book version 10.10

updated 1/30/18

The following are corrections to the Mojave Magnum Rule Book version 10.10 issued in December 2018.

- Appendix H (harnesses) – change paragraph G to read:  
**Most current SFI and FIA harnesses have a use-by date tag. SFI has a “validation date”, FIA has an “expiration date”. We will allow these harnesses to be used for 2 years past these dates. Many other harness sets have a date-of-manufacture tag. These must not be more than 5 years old. Harnesses must never have been used in a crash.**
- Section 3.1, Auto Class U: change “**Must use true racing tires only**” to “**Has the same tire requirements as Class A**”.
- Appendix A, subsection “Auto A (AA) and Auto U (AU) Classes”, paragraph H:
  - delete “**(in class A only)**”
  - change “**except for the R7 in Class A**” to read “**except for the R7**”.
- Appendix A, subsection “Tire and Wheel Rules”, paragraph G:
  - change “use in Class A” to “use in Class A and Class U”

The above changes will be included in Rule Book Version 10.11 dated January 2018.

These changes also mean that the Car Preparation Guide, DOT Racing Radial Tire List, Tire Inspection Form, Changes Since Last Time, and the Quick Reference Guide documents have changed; please download current copies from our website.
