

Mojave Mile – Sept. 25-26, 2010

NOTICE to all competitors and attendees!

At the Mojave airport, along all the taxiways and the runways, there are numerous marker lights on short posts, standing about 2 feet high.

These are right where you will all be parking your rigs and race vehicles, they are along the runway where you are running, and they line the taxiway being used for a return road. You will actually be parking your cars and rigs behind and between these things. They can be easy to lose sight of. You **MUST** be **VERY** careful not to hit one or cause damage in any way.

*** * * * WARNING * * * * WARNING * * * ***

If you damage any of these, if you run over one or even bump one a little, it will cost you \$500 each !!! This is not a joke, and on the waiver that you sign to get in, you will be agreeing to be financially responsible if you break one of these.

PLEASE BE CAREFUL and don't hit any of these!

Thank you, MKM Racing Promotions
